

Toshihiko Hara

A Shrinking Society

Post-Demographic Transition in Japan

 Springer

Contents

1	Introduction: The Demographic Impacts from the Great East Japan Earthquake	1
1.1	The Tōhoku Earthquake and Tsunami	1
1.2	The Demographic Impacts	2
1.3	Comparing the Population Projections: Prefectures Level	3
1.3.1	Total Population	3
1.3.2	Population Aging	4
1.4	Comparing the Population Projections: Cities Level	5
1.4.1	Total Population	5
1.4.2	Population Aging	6
1.5	Impacts of the Great East Japan Earthquake	6
1.6	About This Book	7
	References	9
2	Population Prospects in Japanese Society	11
2.1	From Population Growth to Decline	11
2.2	Changing Dependency Ratios as Indicators of Child/Elder Care Costs	15
2.2.1	Actual Value of Demographic Care Cost (Dependency Ratio)	15
2.2.2	Minimum Value of Demographic Care Cost (NRR = 1.00, The Effect of Life Expectancy)	16
2.2.3	Optimal Value of Demographic Care Cost (NRR < 1 or NRR > 1, The Effect of Fertility)	18
2.3	Depopulation at Sub-national Level: Shrinking Regions	19
2.3.1	Population Decline at Sub-national Level	19
2.3.2	Dependency Ratios at Sub-national Level	20
2.3.3	Problems of the Shrinking Regions	21
2.3.4	What means Depopulation at Sub-national Level?	23
	References	24

3	Demographic Transition and Child/Elderly Care Cost.....	25
3.1	Optimal Care Cost and Net Reproduction Rate	25
3.2	Historical Change of Optimal Care Cost Curves	27
3.3	The Effects of Rising Longevity on Child/Elder Care Costs	27
3.3.1	Female Life Expectancy and Child/Elder Care Costs	27
3.3.2	Age-specific Mortalities (‰) (3 age groups).....	27
3.3.3	Women's survival rate at selected age	29
	References	30
4	Historical Process and Background of Fertility Decline in Japan.....	31
4.1	Female Life Expectancy and Survival Rate of Women	31
4.2	Fertility Effects of the Rising Survival Rate of Women at Reproductive Age	32
4.3	Mean Number of Children Ever Born to Women	34
4.4	Decreasing Number of Children	35
4.5	Causal Model of Demographic Transition in Japan.....	36
4.5.1	First Phase (Increase in Life Expectancy from Aged 40 to 70 Years).....	37
4.5.2	Second Phase (Extension of Life Expectancy Beyond Aged 70 Years)	37
4.6	Conditions for Recovering the Replacement Fertility Level	38
	References	39
5	Sustainability of Japan as a Shrinking Society	41
5.1	Increasing Conflicts on the Redistribution Between Different Social Groups	41
5.2	Collapse of National Finances	43
5.2.1	Increasing National Debt	43
5.2.2	Demographic Impact on National Finances	45
5.2.3	Redistribution Policies.....	46
5.3	Social Security Reform	47
5.3.1	Increasing Social Security Cost.....	47
5.3.2	Necessary Changes to Sustainable Social Security System	49
5.3.3	Expanding Life Time and the Role of Social Security Service	50
	References	51
6	Policy Measures for a Shrinking Society	53
6.1	Family Policies for Recovering Replacement Fertility.....	53
6.1.1	Social Responsibility for Reproduction.....	53
6.1.2	Promotion of Gender Equality in Japan	54
6.1.3	Family Policy Measures for the Social Reproduction.....	55
6.1.4	Career Design for Next Generation.....	55

6.2	Immigration Policies and Globalization of Japanese Society	56
6.2.1	Immigration Policies	56
6.2.2	Globalization of Japanese Society	57
6.3	Selections and Re-concentration of Communities	57
6.3.1	Sustainability of Regional Communities	57
6.3.2	Reform of Local Administration System	58
6.3.3	Regional Community and Inhabitants	60
6.3.4	From Merely 'Shrinking' to 'Selection and Concentration' for Newly Designed National Land Use	61
	References	62
7	Epilogue: The Principle of the Sustainable Population	63
7.1	The Principle of the Sustainable Population	63
7.2	Conclusion	65
	References	65
