<b>FOREWORD</b>	<b>XIII</b>
<b>ABOUT THE AUTHORS</b>	<b>XVII</b>
<b>PREFACE</b>	<b>XIX</b>
<b>ACRONYMS</b>	<b>XXIII</b>
<b>1 “LOOKING BACK: REFLECTIONS ON COST ESTIMATING”</b>	<b>1</b>
Reference, 10	
<b>2 INTRODUCTION TO COST ESTIMATING</b>	<b>11</b>
2.1 Introduction, 11	
2.2 What is Cost Estimating? 11	
2.3 What Are the Characteristics of a Good Cost Estimate? 13	
2.4 Importance of Cost Estimating in DoD and in Congress. Why Do We Do Cost Estimating? 14	
2.4.1 Importance of Cost Estimating to Congress, 16	
2.5 An Overview of the DoD Acquisition Process, 17	
2.6 Acquisition Categories (ACATs), 23	
2.7 Cost Estimating Terminology, 24	
Summary, 30	
References, 31	
Applications and Questions, 31	
<b>3 NON-DoD ACQUISITION AND THE COST ESTIMATING PROCESS</b>	<b>32</b>
3.1 Introduction, 32	
3.2 Who Practices Cost Estimation? 32	

- 3.3 The Government Accountability Office (GAO) and the 12-Step Process, 33
- 3.4 Cost Estimating in Other Non-DoD Agencies and Organizations, 38
  - 3.4.1 The Intelligence Community (IC), 38
  - 3.4.2 National Aeronautics and Space Administration (NASA), 38
  - 3.4.3 The Federal Aviation Administration (FAA), 39
  - 3.4.4 Commercial Firms, 39
  - 3.4.5 Cost Estimating Book of Knowledge (CEBOK), 40
  - 3.4.6 Federally Funded Research and Development Centers (FFRDCs), 41
  - 3.4.7 The Institute for Defense Analysis (IDA), 41
  - 3.4.8 The Mitre Corporation, 42
  - 3.4.9 Rand Corporation, 42
- 3.5 The Cost Estimating Process, 43
- 3.6 Definition and Planning. Knowing the Purpose of the Estimate, 43
  - 3.6.1 Definition and Planning. Defining the System, 47
  - 3.6.2 Definition and Planning. Establishing the Ground Rules and Assumptions, 48
  - 3.6.3 Definition and Planning. Selecting the Estimating Approach, 49
  - 3.6.4 Definition and Planning. Putting the Team Together, 51
- 3.7 Data Collection, 52
- 3.8 Formulation of the Estimate, 52
- 3.9 Review and Documentation, 53
- 3.10 Work Breakdown Structure (WBS), 53
  - 3.10.1 Program Work Breakdown Structure, 53
  - 3.10.2 Military-Standard (MIL-STD) 881C, 56
- 3.11 Cost Element Structure (CES), 56
  - Summary, 58
  - References, 59
  - Applications and Questions, 59

## 4 DATA SOURCES

61

- 4.1 Introduction, 61
- 4.2 Background and Considerations to Data Collection, 61
  - 4.2.1 Cost Data, 63
  - 4.2.2 Technical Data, 63

- 4.2.3 Programmatic Data, 64
- 4.2.4 Risk Data, 64
- 4.3 Cost Reports and Earned Value Management (EVM), 65
  - 4.3.1 Contractor Cost Data Reporting (CCDR), 65
  - 4.3.2 Contract Performance Report (CPR), 66
  - 4.3.3 EVM Example, 70
- 4.4 Cost Databases, 74
  - 4.4.1 Defense Cost and Resource Center (DCARC), 75
  - 4.4.2 Operating and Support Costs Databases, 75
  - 4.4.3 Defense Acquisition Management Information Retrieval (DAMIR), 76
- Summary, 76
- Reference, 77
- Applications and Questions, 77

## **5 DATA NORMALIZATION**

**78**

- 5.1 Introduction, 78
- 5.2 Background to Data Normalization, 78
- 5.3 Normalizing for Content, 80
- 5.4 Normalizing for Quantity, 81
- 5.5 Normalizing for Inflation, 83
- 5.6 DoD Appropriations and Background, 87
- 5.7 Constant Year Dollars (CY\$), 88
- 5.8 Base Year Dollars (BY\$), 90
- 5.9 DoD Inflation Indices, 91
- 5.10 Then Year Dollars (TY\$), 95
- 5.11 Using the Joint Inflation Calculator (JIC), 97
- 5.12 Expenditure (Outlay) Profile, 99
  - Summary, 103
  - References, 103
  - Applications and Questions, 103

## **6 STATISTICS FOR COST ESTIMATORS**

**105**

- 6.1 Introduction, 105
- 6.2 Background to Statistics, 105
- 6.3 Margin of Error, 106
- 6.4 Taking a Sample, 109
- 6.5 Measures of Central Tendency, 110
- 6.6 Dispersion Statistics, 113
- 6.7 Coefficient of Variation, 117
  - Summary, 119
  - References, 119

General Reference,	119
Applications and Questions,	119

## **7 LINEAR REGRESSION ANALYSIS** **121**

7.1	Introduction,	121
7.2	Home Buying Example,	121
7.3	Regression Background and Nomenclature,	126
7.4	Evaluating a Regression,	132
7.5	Standard Error (SE),	133
7.6	Coefficient of Variation (CV),	134
7.7	Analysis of Variance (ANOVA),	135
7.8	Coefficient of Determination ( $R^2$ ),	137
7.9	F-Statistic and t-Statistics,	138
7.10	Regression Hierarchy,	140
7.11	Staying Within the Range of Your Data,	142
7.12	Treatment of Outliers,	143
7.12.1	Handling Outliers with Respect to $X$ (The Independent Variable Data),	143
7.12.2	Handling Outliers with Respect to $Y$ (The Dependent Variable Data),	144
7.13	Residual Analysis,	146
7.14	Assumptions of Ordinary Least Squares (OLS)	
	Regression,	149
	Summary,	149
	Reference,	150
	Applications and Questions,	150

## **8 MULTI-VARIABLE LINEAR REGRESSION ANALYSIS** **152**

8.1	Introduction,	152
8.2	Background of Multi-Variable Linear Regression,	152
8.3	Home Prices,	154
8.4	Multi-Collinearity (MC),	158
8.5	Detecting Multi-Collinearity (MC), Method #1: Widely Varying Regression Slope Coefficients,	159
8.6	Detecting Multi-Collinearity, Method #2: Correlation Matrix,	160
8.7	Multi-Collinearity Example #1: Home Prices,	161
8.8	Determining Statistical Relationships between Independent Variables,	163
8.9	Multi-Collinearity Example #2: Weapon Systems,	164
8.10	Conclusions of Multi-Collinearity,	167

- 8.11 Multi-Variable Regression Guidelines, 168
  - Summary, 169
  - Applications and Questions, 170

## **9 INTRINSICALLY LINEAR REGRESSION 172**

- 9.1 Introduction, 172
- 9.2 Background of Intrinsically Linear Regression, 172
- 9.3 The Multiplicative Model, 173
- 9.4 Data Transformation, 174
- 9.5 Interpreting the Regression Results, 178
  - Summary, 178
  - Reference, 179
  - Applications and Questions, 179

## **10 LEARNING CURVES: UNIT THEORY 180**

- 10.1 Introduction, 180
- 10.2 Learning Curve, Scenario #1, 180
- 10.3 Cumulative Average Theory Overview, 182
- 10.4 Unit Theory Overview, 182
- 10.5 Unit Theory, 185
- 10.6 Estimating Lot Costs, 188
- 10.7 Fitting a Curve Using Lot Data, 191
  - 10.7.1 Lot Midpoint, 192
  - 10.7.2 Average Unit Cost (AUC), 194
- 10.8 Unit Theory, Final Example (Example 10.5), 197
- 10.9 Alternative LMP and Lot Cost Calculations, 200
  - Summary, 202
  - References, 202
  - Applications and Questions, 202

## **11 LEARNING CURVES: CUMULATIVE AVERAGE THEORY 204**

- 11.1 Introduction, 204
- 11.2 Background of Cumulative Average Theory (CAT), 204
- 11.3 Cumulative Average Theory, 206
- 11.4 Estimating Lot Costs, 210
- 11.5 Cumulative Average Theory, Final Example, 210
- 11.6 Unit Theory vs. Cumulative Average Theory, 214
  - 11.6.1 Learning Curve Selection, 215
  - Summary, 216
  - Applications and Questions, 216

<b>12</b>	<b>LEARNING CURVES: PRODUCTION BREAKS/LOST LEARNING</b>	<b>218</b>
12.1	Introduction, 218	
12.2	The Lost Learning Process, 219	
12.3	Production Break Scenario, 219	
12.4	The Anderlohr Method, 220	
12.5	Production Breaks Example, 221	
12.6	The Retrograde Method, Example 12.1 (Part 2), 224	
	Summary, 229	
	References, 229	
	Applications and Questions, 230	
<b>13</b>	<b>WRAP RATES AND STEP-DOWN FUNCTIONS</b>	<b>231</b>
13.1	Introduction, 231	
13.2	Wrap Rate Overview, 231	
13.3	Wrap Rate Components, 232	
	13.3.1 Direct Labor Rate, 233	
	13.3.2 Overhead Rate, 233	
	13.3.3 Other Costs, 234	
13.4	Wrap Rate, Final Example (Example 13.2), 235	
13.5	Summary of Wrap Rates, 236	
13.6	Introduction to Step-Down Functions, 236	
13.7	Step-Down Function Theory, 237	
13.8	Step-Down Function Example 13.1, 238	
13.9	Summary of Step-Down Functions, 240	
	Reference, 240	
	Applications and Questions, 240	
<b>14</b>	<b>COST FACTORS AND THE ANALOGY TECHNIQUE</b>	<b>242</b>
14.1	Introduction, 242	
14.2	Cost Factors Scenario, 242	
14.3	Cost Factors, 243	
14.4	Which Factor to Use? 246	
14.5	Cost Factors Handbooks, 246	
14.6	Unified Facilities Criteria (UFC), 247	
14.7	Summary of Cost Factors, 248	
14.8	Introduction to the Analogy Technique, 248	
14.9	Background of Analogy, 249	
14.10	Methodology, 250	
14.11	Example 14.1, Part 1: The Historical WBS, 250	
14.12	Example 14.1, Part 2: The New WBS, 253	

- 14.13 Summary of the Analogy Technique, 255
- Reference, 256
- Applications and Questions, 256

## **15 SOFTWARE COST ESTIMATION 257**

- 15.1 Introduction, 257
- 15.2 Background on Software Cost Estimation, 257
- 15.3 What is Software? 258
- 15.4 The WBS Elements in a typical Software Cost Estimating Task, 259
- 15.5 Software Costing Characteristics and Concerns, 260
- 15.6 Measuring Software Size: Source Lines of Code (SLOC) and Function Points (FP), 261
  - 15.6.1 Source Lines of Code: (SLOC), 261
  - 15.6.2 Function Point (FP) Analysis, 263
- 15.7 The Software Cost Estimating Process, 264
- 15.8 Problems with Software Cost Estimating: Cost Growth, 265
- 15.9 Commercial Software Availability, 267
  - 15.9.1 COTS in the Software Environment, 268
- 15.10 Post Development Software Maintenance Costs, 268
  - Summary, 269
  - References, 269

## **16 COST BENEFIT ANALYSIS AND RISK AND UNCERTAINTY 270**

- 16.1 Introduction, 270
- 16.2 Cost Benefit Analysis (CBA) and Net Present Value (NPV) Overview, 270
- 16.3 Time Value of Money, 273
- 16.4 Example 16.1. Net Present Value, 277
- 16.5 Risk and Uncertainty Overview, 281
- 16.6 Considerations for Handling Risk and Uncertainty, 283
- 16.7 How do the Uncertainties Affect our Estimate? 284
- 16.8 Cumulative Cost and Monte Carlo Simulation, 287
- 16.9 Suggested Resources on Risk and Uncertainty Analysis, 289
  - Summary, 290
  - References, 290
  - Applications and Questions, 290
