CHEMNITZ

Prof. Dr. rer. nat. Thorsten Schmidt, Advisor
June 9, 2014

Contents

1 Introduction **3**

2 Models On Credit Risk - An Overview **5**
2.1 Modeling default times 5
2.1.1 The continuous case 14
2.2 Existing models 16
2.2.1 Exogenously driven defaults 16
2.2.2 Default due to economic fundamentals 23
2.2.3 Conjoined models of default 29
2.3 Multi-name extensions 34
2.3.1 Top-down models 35

3 A Credit Risk Model With Evolving News **43**
3.1 The model for the default time 43
3.2 Dynamic term structure models 47
3.3 Heath-Jarrow-Merton Model with discontinuities 55
3.3.1 Generalized affine Merton models 61

4 A Top-Down Market Model With Credit Risk **67**
4.1 Market Models 67
4.1.1 A Lévy market model with default risk 70
4.1.2 Modeling assumptions 72
4.2 An affine specification 77
4.3 Pricing 80
4.4 Calibration 85
4.4.1 Calibration procedure 88
4.4.2 Calibration results 90

A Appendix 1 **95**
A.1 Auxiliary Results 95
A.2 Computations 96
