

Tackling Harmful Alcohol Use

ECONOMICS AND PUBLIC HEALTH POLICY

Edited by Franco Sassi

Table of contents

Acronyms and abbreviations	13
Executive summary	15
Chapter 1. Alcohol: The public health side of a social phenomenon	19
By <i>Franco Sassi and Patrick Love</i>	
Key findings	20
Alcohol, a common fixture in human societies	20
Harmful use of alcohol: The size of the problem	22
Protective and harmful effects: A public health perspective	23
A social welfare perspective on alcohol policy	28
The book's main conclusions	31
Overview of the remaining chapters	34
Notes	36
Bibliography	36
Chapter 2. Trends in alcohol consumption in OECD countries	39
By <i>Marion Devaux and Franco Sassi</i>	
Key findings	40
Alcohol: How do countries compare?	40
Is alcohol consumption falling or rising?	41
Dominant beverages and patterns of drinking	46
Identifying hazardous drinkers	48
Tracking changes in alcohol consumption over time	48
Changes in hazardous and heavy episodic drinking	50
Drinking initiation and alcohol use by young people	52
Cohort patterns in alcohol drinking	56
Conclusion: Convergence and divergence	58
Notes	58
Bibliography	58
Chapter 3. Social disparities in alcohol drinking	61
By <i>Marion Devaux</i>	
Key findings	62
Identifying social patterns in alcohol drinking	62
The gender dimension: Drinking habits in men and women	62
Social disparities in any alcohol drinking	64
Social disparities in hazardous drinking	66
Social disparities in heavy episodic drinking	68

Ethnic disparities in alcohol use	70
Alcohol and labour market outcomes: A complex link	70
Different gradients in consumption and alcohol-related harm?	76
Notes	77
Bibliography	77
Special focus I. The impact of alcohol consumption on global health	81
<i>By Vladimir Poznyak and Dag Rekve</i>	
Introduction	82
Pathways and mechanisms of alcohol-related harm	82
Levels and patterns of alcohol consumption	83
Alcohol-attributable mortality and morbidity	83
Factors impacting on health consequences	84
Harm to others	85
Policy action to reduce the harmful use of alcohol	85
References	85
Chapter 4. Tackling alcohol-related harms: What policy approaches?	87
<i>By Michele Cecchini and Annalisa Belloni</i>	
Key findings	88
One goal, many policy options	88
Global and national strategies to reduce the harmful use of alcohol	92
Main approaches in the alcohol policy toolkit	93
The role of business stakeholders	112
Note	114
Bibliography	114
Special focus II. Alcohol advertising and heavy drinking	121
<i>By Henry Saffer</i>	
Introduction	122
Alcohol advertising	122
Psychology and neuroscience research	123
Conclusions	125
Notes	126
References	126
Special focus III. How does minimum unit pricing for alcohol affect different types of drinkers?	127
<i>By Anne Ludbrook</i>	
Introduction	128
Price effects on population subgroups	128
Purchasing patterns for low cost alcohol	129
Other pricing interventions	131
Conclusion	131
Notes	131
References	131

Special focus IV. A business case for reducing alcohol-related harm in the workplace	133
By <i>Marjana Martinic</i>	
Introduction	134
The rationale for tackling alcohol-related problems in the workplace	134
Workplace interventions: Effectiveness and cost effectiveness	135
Sectoral examples of alcohol-related interventions	136
Challenges to workplace interventions	137
References	138
Chapter 5. Health and economic impacts of key alcohol policy options	141
By <i>Franco Sassi, Michele Cecchini, Marion Devaux, Roberto Astolfi</i>	
Key findings	142
Assessing the impacts of alcohol policies	143
What does previous evidence tell us?	147
What we can (and cannot) learn from a simulation model	149
A new assessment: The policy options	150
The countries examined: Canada, the Czech Republic and Germany	160
Policy impacts on harmful alcohol use, longevity and disability	161
Policy impacts on the incidence of alcohol-related diseases and injuries	167
Implementation costs, effects on health expenditure, and the cost effectiveness of policies	167
Who benefits the most from alcohol policies?	176
Robustness of findings from the analysis of policy impacts	178
Note	180
Bibliography	180
Special focus V. Benefits of population-wide approaches to prevention: The case of minimum alcohol prices	187
By <i>Martin McKee</i>	
Bibliography	190
Chapter 6. Alcohol, the individual and society: A call for coherent alcohol policies ..	191
By <i>Franco Sassi</i>	
Key findings	192
Harmful alcohol use: An old problem with new dimensions	192
The sheer complexity of addressing harmful alcohol use	195
Should governments intervene? And what can they achieve?	199
The scope for a multi-stakeholder approach to harmful alcohol use	202
Bibliography	203
Annex A. Supplementary figures and tables	205
1. Supplementary tables and figures associated with Chapters 2 and 3	205
2. Supplementary tables and figures associated with Chapter 4	214
3. Supplementary tables and figures associated with Chapter 5	217
Annex B. Authors' and contributors' biographies	233
