

Friedemann Polzin

Addressing Barriers to Low-Carbon Innovation

**Essays on Structures and Policies
to Mobilise Private Finance**

Table of contents

List of figures	13
List of tables	15
List of abbreviations.....	17
1 Introduction.....	19
1.1 Motivation, purpose and scope of the research	19
1.2 Theoretical background and research context	21
1.3 Research questions and methodologies	24
2 Barriers to low-carbon innovation and policy responses in innovation studies literature.....	29
2.1 Introduction.....	29
2.2 Methodology	31
2.2.1 Research approach.....	31
2.2.2 Developing an analytical framework for the literature review	33
2.3 Barriers to low-carbon innovation along the innovation cycle	34
2.3.1 Technological barriers.....	35
2.3.2 Institutional barriers	36
2.3.3 Economic barriers	37
2.3.4 Financial barriers.....	38
2.3.5 Political barriers.....	38
2.3.6 Interaction and capability barriers	39
2.3.7 Transformation barriers.....	40
2.4 Policy approaches to address the barriers.....	40
2.4.1 Active technology policy	41
2.4.2 Institutional support	42

2.4.3	Fixing market failures and market creation	43
2.4.4	Mobilise public and private investment.....	44
2.4.5	Interactive and reflexive policy design.....	45
2.4.6	Fostering interaction, increasing knowledge and learning.....	46
2.4.7	Facilitate transformation	47
2.5	Barriers to low-carbon innovation and policy responses.....	47
2.5.1	Discussion.....	47
2.5.2	Avenues for future research.....	50
2.6	Conclusion and policy implications	53
3	Accelerating the cleantech revolution: Exploring the financial mobilisation functions of institutional innovation intermediaries	57
3.1	Introduction.....	57
3.2	Theoretical background	59
3.2.1	Financing of R&D and innovation.....	59
3.2.2	The role of intermediaries in addressing (financial) barriers.....	61
3.2.3	Research question and research gap	65
3.3	Methods and data.....	65
3.3.1	Research context	66
3.3.2	Sample.....	66
3.3.3	Data collection	69
3.3.4	Data analysis.....	70
3.4	Results.....	73
3.4.1	An intermediaries' perspective on the relation between financial barriers and other barriers to (low-carbon) innovation	73
3.4.2	Role of institutional intermediaries in addressing these barriers.....	75
3.5	Discussion and conclusions.....	78
3.5.1	Addressing financial barriers requires a holistic perspective	78

3.5.2 Exploring the financial mobilisation functions of (institutional) innovation intermediaries.....	79
3.5.3 The synergic role of financial mobilisation intermediation with other intermediation functions.....	81
3.6 Conclusion and implications for research and policy.....	83
4 Exploring the role of ESCOs to overcome barriers for innovative energy demand reduction technologies – the case of public LED street lighting in German municipalities	85
4.1 Introduction.....	85
4.2 Theoretical background	87
4.2.1 Challenges facing adoption of novel end-use energy demand technologies	87
4.2.2 ESCO solutions for the diffusion of end-use energy demand technologies	88
4.2.3 Research gaps identified in the literature	89
4.2.4 Analytical Framework: Transaction cost economics	89
4.3 Methods and data.....	92
4.3.1 Case study: LED street lighting and ESCO solutions in German municipalities	92
4.3.2 Data Collection	95
4.3.3 Data Analysis.....	96
4.4 Results: Factors affecting the diffusion of LED street lighting and EPC	96
4.4.1 Technological factors	97
4.4.2 Competency and capacity factors.....	97
4.4.3 Institutional factors	99
4.4.4 Economic / investment factors	100
4.5 Discussion	104
4.5.1 Factors affecting the diffusion of LED street lighting and associated services	104
4.5.2 Modes of governance for novel end-use energy demand technologies.....	104

4.5.3	Using TCE for the analysis of ESCO solutions.....	106
4.6	Conclusions and implications	107
4.6.1	Conclusions	107
4.6.2	Implications for policy makers and managers.....	108
4.6.3	Limitations and future research.....	109
5	Public policy influence on renewable energy investments – a panel data study across OECD countries.....	111
5.1	Introduction.....	111
5.2	Theoretical background	113
5.2.1	Public policy influence on renewable energy deployment.....	113
5.2.2	Investors’ perspective on renewable energies	116
5.3	Methods and data.....	118
5.3.1	Research design.....	118
5.3.2	Data	118
5.3.3	Model	119
5.3.4	Longitudinal analysis (panel data regression)	122
5.4	Results and discussion.....	124
5.4.1	Fiscal and financial incentives	127
5.4.2	Market-based incentives	129
5.4.3	Direct investments.....	131
5.4.4	Policy support	131
5.4.5	Regulatory instruments	132
5.4.6	Robustness checks	132
5.5	Conclusions and policy implications	133
6	Conclusions and implications.....	137
6.1	Conclusions	137
6.1.1	Barriers to low-carbon innovation inhibit the financing for companies, projects and infrastructure	137

6.1.2	Transparent structures which focus on risk and return facilitate private investments into clean technologies along the innovation cycle	138
6.1.3	Science, technology and innovation (STI) policies and regulation are needed to spur private investments into clean technologies.....	140
6.2	Implications for research and policy makers	142
6.2.1	Implications for research	142
6.2.2	Implications for policy makers	145
6.3	Limitations.....	147
6.4	Future research	148
7	References.....	151
8	Appendix.....	179
8.1	Appendix for chapter 3.....	179
8.1.1	Supplementary data (i.e. organised quotes)	179
8.1.2	Interview guide	184
8.2	Appendix for chapter 4.....	185
8.2.1	Interview guide	185
8.2.2	Interview participants	186
8.3	Appendix for chapter 5.....	188
8.3.1	Case selection.....	188
8.3.2	Summary statistics.....	189
8.3.3	Robustness checks	192
