

Macroeconomics of the Labor Market: Implications of New Theoretical Mechanisms

der Rechts- und Wirtschaftswissenschaftlichen Fakultät
Fachbereich Wirtschaftswissenschaften

der Friedrich-Alexander-Universität Erlangen-Nürnberg
zur Erlangung des Doktorgrades
Dr. rer. pol.

vorgelegt von
Britta Kohlbrecher, M.A.
aus Pinneberg

Contents

1	Introduction	1
1.1	Background	1
1.2	Outline and Relation to the Literature	5
2	Optimal Monetary Policy under Rigid Wages and Decreasing Returns	9
2.1	Introduction	9
2.2	Relation to the Literature	11
2.3	The Model	13
2.3.1	Household	13
2.3.2	Firms and Production	14
2.3.3	Equilibrium	18
2.4	Constrained Efficient Allocation	19
2.5	The Inflation-Unemployment Trade-off	21
2.5.1	The Inflation-Unemployment Trade-off under Rigid Wages and Constant Returns	21
2.5.2	The Inflation-Unemployment Trade-off under Rigid Wages and Decreasing Returns	21
2.6	Optimal Monetary Policy	23
2.6.1	The Ramsey Policy	23
2.6.2	Calibration	24
2.6.3	Results	25
2.7	Conclusion	29
	Appendix to Chapter 2	30
2.A	Derivation of Constrained Efficient Allocation	30
2.B	Different Recruiting Costs	32
2.C	Wage with Firm-Level Employment	32
3	The Effects of Productivity and Benefits on Unemployment: Breaking the Link	35
3.1	Introduction	35
3.2	Empirical Literature Review	38

3.3	An Incentive Model of Two-Sided Search	40
3.3.1	Wage Determination	40
3.3.2	The Firm's Behavior	41
3.3.3	The Worker's Behavior	43
3.3.4	Employment	46
3.3.5	Free Entry of Firms	46
3.3.6	The Labor Market Equilibrium and Aggregation	47
3.4	Analytical Results	48
3.5	Calibration	50
3.6	Numerical Results	52
3.6.1	Business Cycle Dynamics	52
3.6.2	The Effects of a Rise in Unemployment Compensation	54
3.7	Conclusion	54
	Appendix to Chapter 3	56
3.A	Derivations of Worker's Behavior	56
3.B	Analytical Derivations	56
3.B.1	Job-Offer Decision	57
3.B.2	The Job-Acceptance Decision	57
3.C	Tight Link in Search and Matching Model	61
4	Revisiting the Matching Function	63
4.1	Introduction	63
4.2	A Simple Model	66
4.2.1	Model Environment	66
4.2.2	Contacts	67
4.2.3	The Selection Decision	68
4.2.4	Vacancies	68
4.2.5	Wages	69
4.2.6	Employment	70
4.2.7	Labor Market Equilibrium	71
4.3	Analytics	71
4.3.1	Degenerate Contact Function	71
4.3.2	Traditional Contact Function	75
4.3.3	Robustness Checks	76
4.4	Theory and Evidence	76
4.4.1	Empirical Matching Function	77
4.4.2	The Wage Distribution	78
4.4.3	Numerical Results	80

4.5	Why It Matters to Account for Idiosyncratic Productivity Shocks	83
4.5.1	Business Cycle Asymmetries	84
4.5.2	Vacancy Posting Costs and the Time Trend in the Matching Function	87
4.6	Conclusion	89
	Appendix to Chapter 4	91
4.A	Illustration	91
4.B	Theory: Derivations	91
4.B.1	Baseline Results	92
4.B.2	Endogenous Separations	94
4.B.3	Same Idiosyncratic Shock for the Entire Employment Span	95
4.C	Data Description	96
4.D	Non-Parametric Results	98
4.E	Parametrization of the Model	98
4.F	Different Wage Groups	100
5	Business Cycle Asymmetries and the Labor Market	103
5.1	Introduction	103
5.2	Stylized Facts	106
5.3	The Model	112
5.3.1	Contacts	113
5.3.2	The Selection Decision	113
5.3.3	Vacancies	114
5.3.4	Wages	114
5.3.5	Employment	115
5.3.6	Labor Market Equilibrium	115
5.4	Analytical Results	115
5.5	Calibration	119
5.6	Results	121
5.6.1	Inspecting the Mechanism Numerically	121
5.6.2	Beveridge Curve and Matching Function	122
5.6.3	State Dependent Effects	125
5.7	Connection to the Literature	127
5.8	Conclusion	128
	Appendix to Chapter 5	129
5.A	Data	129
5.B	Skewness and Log-Approximation	130
5.B.1	Skewness Measure	130
5.B.2	Growth Rates versus Log-Approximation	130

5.C	Analytical Appendix	132
5.C.1	Search and Matching Model	132
5.C.2	Selection Model	133
6	Conclusion and Outlook	137
	Bibliography	141
