Preface

I

ANIMAL STUDIES ON REWARDS, PUNISHMENTS, AND DECISION- MAKING

1. Anatomy and Connectivity of the Reward Circuit

S.N. HABER

Introduction	3
Prefrontal Cortex	4
The Ventral Striatum	5
Ventral Pallidum	10
The Midbrain Dopamine Neurons	11
Completing the Cortical–Basal Ganglia Reward Circuit	14
References	15

2. Electrophysiological Correlates of Reward Processing in Dopamine Neurons

W. SCHULTZ

Introduction	21
Basics of Dopamine Reward-Prediction Error Coding	21
Subjective Value and Formal Economic Utility Coding	25
Dopamine and Decision-Making	27
Acknowledgments	29
References	29

3. Appetitive and Aversive Systems in the Amygdala

S. BERNARDI AND D. SALZMAN

Introduction	33
Conclusion	41
References	42

4. Ventral Striatopallidal Pathways Involved in Appetitive and Aversive Motivational Processes

Y. SAGA AND L. TREMBLAY

Introduction	47
The Corticobasal Ganglia Functional Circuits: The Relation Between the Cortex and the Basal Ganglia	49
The Direct and Indirect Pathways: From Inhibition of Competitive Movement to Aversive Behaviors	49
Single-Unit Recording in Awake Animals to Investigate the Neural Bases	50
Tasks to Investigate Appetitive Approach Behavior and Positive Motivation	51
Ventral Striatum and Ventral Pallidum Are Also Involved in Aversive Behaviors: First Evidence of Local Inhibitory Dysfunction	51
The Ventral Striatum and the Ventral Pallidum Encode Aversive Future Events for Preparation of Avoidance and for Controlling Anxiety Level	53
Abnormal Aversive Processing Could Bias Decision-Making Toward Pathological Behaviors	55
Conclusion	55
Acknowledgments	55
References	55

5. Reward and Decision Encoding in Basal Ganglia: Insights From Optogenetics and Viral Tracing Studies in Rodents

J. TIAN, N. UCHIDA AND N. ESHEL

Dopamine	59
Striatum	64
Conclusions	67
References	67

6. The Learning and Motivational Processes Controlling Goal-Directed Action and Their Neural Bases

L.A. BRADFIELD AND B.W. BALLEINE

Learning "What Leads to What": The Neural Bases of Action—Outcome Learning	72
How Rewards Are Formed: Neural Bases of Incentive Learning	74
Deciding What to Do: The Neural Bases of Outcome Retrieval and Choice	76
How These Circuits Interact: Convergence on the Dorsomedial Striatum	77
Conclusion	79
Acknowledgments	79
References	79

7. Impulsivity, Risky Choice, and Impulse Control Disorders: Animal Models

T.W. ROBBINS AND J.W. DALLEY

Delayed and Probabilistic Discounting: "Impulsive Choice" in Decision-Making	82
Premature Responding in the 5CSRTT	83
Stop-Signal Reaction Time	83
Neural Basis of Impulsivity	84
Neural Substrates of Waiting Impulsivity	84
Neural Substrates of Probability Discounting of Reward: Risky Choice	89
Motor Impulsivity: Stop-Signal Inhibition	90
Conclusion	90
Acknowledgments	91
References	91

8. Prefrontal Cortex in Decision-Making: The Perception—Action Cycle

J.M. FUSTER

The Perception—Action Cycle	96
Inputs to the Perception—Action Cycle in Decision-Making	97
Prediction and Preparation Toward Decision	99
Execution of Decision	101
Feedback From Decision: Closure of the Perception—Action Cycle	102
References	103

II

HUMAN STUDIES ON MOTIVATION, PERCEPTUAL, AND VALUE-BASED DECISION-MAKING

9. Reward, Value, and Salience

T. KAHNT AND P.N. TOBLER

Introduction	109
Value	110

Salience	113
Conclusions	118
References	118

10. Computational Principles of Value Coding in the Brain

K. LOUIE AND P.W. GLIMCHER

Introduction	121
Value and Choice Behavior	121
Value Coding in Decision Circuits	123
Context Dependence in Brain and Behavior	125
Neural Computations Underlying Value Representation	127
Temporal Dynamics and Circuit Mechanisms	130
Conclusions	133
References	133

11. Spatiotemporal Characteristics and Modulators of Perceptual Decision-Making in the Human Brain

M.G. PHILIASTIDES, J.A. DIAZ AND S. GHERMAN

Introduction	137
Factors Affecting Perceptual Decision-Making	139
Conclusion	145
References	145

12. Perceptual Decision-Making: What Do We Know, and What Do We Not Know?

C. SUMMERFIELD AND A. BLANGERO

Introduction	149
What Are Perceptual Decisions?	149
Aims and Scope of This Chapter	150
Decision Optimality	150
Q1: How Is Information Integrated During Perceptual Decision-Making?	150
Q2: What Computations Do Cortical Neurons Perform During Perceptual Decisions?	153
Q3: How Can We Study Perceptual Decision-Making in Humans?	155
Q4: How Do Observers Decide When to Decide?	157
Q5: How Are Perceptual Decisions Biased by Prior Beliefs?	158
Conclusions and Future Directions	160
Acknowledgments	160
References	160

13. Neural Circuit Mechanisms of Value-Based Decision-Making and Reinforcement Learning

A. SOLTANI, W. CHAISANGMONGKON AND X.-J. WANG

Introduction	163
Representations of Reward Value	164
Learning Reward Values	165

Stochastic Dopamine-Dependent Plasticity for Learning Reward Values	167
Foraging With Plastic Synapses	167
Random Choice and Competitive Games	170
Probabilistic Inference With Stochastic Synapses	171
Concluding Remarks	173
Acknowledgments	174
References	174

III

SOCIAL DECISION NEUROSCIENCE

14. Social Decision-Making in Nonhuman Primates

M. JAZAYARI, S. BALLESTA AND J.-R. DUHAMEL

Introduction	179
Behavioral Studies on Social Decision-Making	180
Neuronal Correlates of Decision-Making in a Social Context	182
Conclusions and Perspectives	185
References	185

15. Organization of the Social Brain in Macaques and Humans

M.P. NOONAN, R.B. MARS, F.X. NEUBERT, B. AHMED, J. SMITH, K. KRUG AND J. SALLET

Introduction	189
Medial Prefrontal Cortex	190
Superior Temporal Sulcus and Temporal Parietal Junction	193
A Social Brain Network	194
Summary and Perspectives	195
References	196

16. The Neural Bases of Social Influence on Valuation and Behavior

K. IZUMA

Introduction	199
The Effect of Mere Presence of Others on Prosocial Behavior	199
The Effect of Others' Opinions on Valuation	203
Concluding Remarks	206
References	206

17. Social Dominance Representations in the Human Brain

R. LIGNEUL AND J.-C. DREHER

Introduction	211
Learning Social Dominance Hierarchies	212

Interindividual Differences and Social Dominance	216
Neurochemical Approaches to Social Dominance and Subordination	218
Conclusion	222
Acknowledgments	222
References	222

18. Reinforcement Learning and Strategic Reasoning During Social Decision-Making

H. SEO AND D. LEE

Introduction	225
Model-Free Versus Model-Based Reinforcement Learning	226
Neural Correlates of Model-Free Reinforcement Learning During Social Decision-Making	227
Neural Correlates of Hybrid Reinforcement Learning During Social Decision-Making	227
Arbitration and Switching Between Learning Algorithms	228
Conclusions	230
References	230

19. Neural Control of Social Decisions: Causal Evidence From Brain Stimulation Studies

G. UGAZIO AND C.C. RUFF

Introduction	233
Noninvasive Brain Stimulation Methods Used for Studying Social Decisions	234
Brain Stimulation Studies of Social Emotions	235
Brain Stimulation Studies of Social Cognition	236
Brain Stimulation Studies of Social Behavioral Control	238
Brain Stimulation Evidence for Social-Specific Neural Activity	240
Conclusions	241
References	242

20. The Neuroscience of Compassion and Empathy and Their Link to Prosocial Motivation and Behavior

G. CHIERCHIA AND T. SINGER

Introduction	247
The "Toolkit" of Social Cognition	248
The Neural Substrates of Empathy	249
The Psychological and Neural Bases of Compassion	250
Conclusion	255
References	255

IV

HUMAN CLINICAL STUDIES INVOLVING DYSFUNCTIONS OF REWARD AND DECISION-MAKING PROCESSES

21. Can Models of Reinforcement Learning Help Us to Understand Symptoms of Schizophrenia?

G.K. MURRAY, C. TUDOR-SFETEA AND P.C. FLETCHER

Introduction	261
Reward Processing in Schizophrenia: A Historical Perspective	262
Dopamine, Schizophrenia, and Reinforcement Learning	263
The Possible Importance of Glutamate	263
Studies of Reward Processing/Reinforcement Learning in Psychosis: Behavioral Studies	264
Studies of Reward Processing/Reinforcement Learning in Psychosis: Neuroimaging Studies	265
Can an Understanding of Reward and Dopamine Help Us to Understand Symptoms of Schizophrenia?	269
Summary	272
Acknowledgments	273
References	273

22. The Neuropsychology of Decision- Making: A View From the Frontal Lobes

A.R. VAIDYA AND L.K. FELLOWS

Introduction	277
Lesion Evidence in Humans	278
Decision-Making and the Frontal Lobes	279
Component Processes of Decision-Making	279
Summary	286
Acknowledgments	286
References	286

23. Opponent Brain Systems for Reward and Punishment Learning: Causal Evidence From Drug and Lesion Studies in Humans

S. PALMINTERI AND M. PESSIGLIONE

The Neural Candidates for Reward and Punishment Learning Systems	294
Evidence From Drug and Lesion Studies	296
Conclusions, Limitations, and Perspectives	300
References	300

24. Decision-Making and Impulse Control Disorders in Parkinson's Disease

V. VOON

Introduction	305
The Role of Dopaminergic Medications and Individual Vulnerability in Parkinson's Disease	305
Reinforcing Effects and Associative Learning	307
Learning From Feedback	308
Risk and Uncertainty	309
Impulsivity	310
Summary	311
References	312

25. The Subthalamic Nucleus in Impulsivity

K. WITT

Introduction	315
Anatomy, Physiology, and Function of Corticobasal Ganglia Circuits	315
The Subthalamic Nucleus and Decision-Making: Evidence From Animal Studies	317
The Subthalamic Nucleus and Impulsivity: Evidence From Behavioral Observations	317
The Subthalamic Nucleus and Decision-Making: Evidence From Neuropsychological Studies	319
A Model of the Impact of the Subthalamic Nucleus on Decision-Making	321
References	322

26. Decision-Making in Anxiety and its Disorders

D.W. GRUPE

Introduction	327
Summary and Conclusions	335
References	336

27. Decision-Making in Gambling Disorder: Understanding Behavioral Addictions

L. CLARK

Introduction: Gambling and Disordered Gambling	339
Loss Aversion	340
Probability Weighting	341
Perceptions of Randomness	342
Illusory Control	344
Conclusion	345
Disclosures	345
References	345

V

GENETIC AND HORMONAL INFLUENCES ON MOTIVATION AND SOCIAL BEHAVIOR

28. Decision-Making in Fish: Genetics and Social Behavior

R.D. FERNALD

Social System of the African Cichlid Fish, <i>Astatotilapia burtoni</i>	351
Domains of <i>Astatotilapia burtoni</i> Social Decisions	353
Summary	358
References	358

29. Imaging Genetics in Humans: Major Depressive Disorder and Decision-Making

U. RABL, N. ORTNER AND L. PEZAWAS

Introduction	361
Major Depressive Disorder as a Disorder of Decision-Making	361
Imaging Genetics of Major Depressive Disorder	364
Conclusion	365
References	367

30. Time-Dependent Shifts in Neural Systems Supporting Decision-Making Under Stress

E.J. HERMANS, M.J.A.G. HENCKENS, M. JOËLS AND G. FERNÁNDEZ

Introduction	371
Large-Scale Neurocognitive Systems and Shifts in Resource Allocation	372
Salience Network and Acute Stress	373
Executive Control Network and Acute Stress	376
Salience Network and Executive Control Network and Recovery From Stress	377
Summary and Conclusion	378
References	380

31. Oxytocin's Influence on Social Decision-Making

A. LEFEVRE AND A. SIRIGU

Introduction	387
Oxytocin and Perception of Social Stimuli	388
Oxytocin and Social Decisions	389
Oxytocin and Social Reward	390
Oxytocin, Learning, and Memory	392

Perspectives	392
Acknowledgments	393
References	393

32. Appetite as Motivated Choice: Hormonal and Environmental Influences

A. DAGHER, S. NESELILER AND J.-E. HAN

Introduction	397
Appetitive Brain Systems Promote Food Intake	398
Self-Control and Lateral Prefrontal Cortex: Role in Appetite Regulation and Obesity	401
Interaction Between Energy Balance Signals and Decision-Making	402
Conclusion	404
References	404

33. Perspectives

J.-C. DREHER, L. TREMBLAY AND W. SCHULTZ

Identifying Fundamental Computational Principles: Produce Conceptual Foundations for Understanding the Biological Basis of Mental Processes Through Development of New Theoretical and Data Analysis Tools	411
Understanding the Functional Organization of the Prefrontal Cortex and the Nature of the Computations Performed in Various Subregions: Value-Coding Computations	412
Demonstrating Causality: Linking Brain Activity to Behavior by Developing and Applying Precise Interventional Tools That Change Neural Circuit Dynamics	413
Maps at Multiple Scales: Generate Circuit Diagrams That Vary in Resolution From Synapses to the Whole Brain	414
The Brain in Action: Produce a Dynamic Picture of the Functioning Brain by Developing and Applying Improved Methods for Large-Scale Monitoring of Neural Activity	415
The Analysis of Circuits of Interacting Neurons	415
Develop Innovative Technologies and Simultaneous Measures to Understand How the Brain Makes Decisions	416
Advancing Human Decision Neuroscience: Understanding Neurological/Psychiatric Disorders and Treating Brain Diseases	417
Conclusions	418
Reference	418

Index	419
