Executive Summary	1
1 Introduction: the food security challenge and the promise of financing mechanisation	11
2 The context for mechanisation and agricultural finance: complex rural livelihoods in SSA	20
3 Mechanisation in SSA and its implications for food security	32
3.1 Understanding mechanisation in SSA	32
3.2 Barriers to successful mechanisation in SSA	39
3.3 Intended and unintended consequences for food security: how can mechanisation have a positive impact?	49
3.3.1 Effects on people and land	49
3.3.2 Implications for food security	62
3.4 Success factors for sustainable mechanisation	69
4 Financing mechanisation – challenges and solutions	73
4.1 Financing mechanisation must be guided by commercial principles	75
4.2 The demand-side of financing mechanisation	78
4.2.1 Farmers have diverse and complex financial management needs	78
4.2.2 Constraints of farmers in accessing financial services for mechanisation	83
4.2.3 Alternative business models for individual ownership of machinery exist	86
4.3 The supply side of financial services for mechanisation	88
4.3.1 Supply-side challenges to provide financing for mechanisation	89

4.3.2	Various financial products can enable mechanisation	92
4.3.3	Landscape of financial service providers	105
4.3.4	Cost-effective distribution channels for financial services are key to scale	108
4.4	Success factors and guiding principles for mechanisation finance	111
5	Conclusion	114
