The Internet of Things in the Modern Business Environment

In Lee
Western Illinois University, USA
Table of Contents

Preface...................................................................................................................................................... xv

Acknowledgment ................................................................................................................................... xviii

Section 1
IoT Adoption and Implementation

Chapter 1
A Literature Review of the Emerging Field of IoT Using RFID and Its Applications in Supply
Chain Management ....................................................................................................................................... 1
       Suvendu Naskar, Indian Institute of Management Calcutta, India
       Preetam Basu, Indian Institute of Management Calcutta, India
       Anup K. Sen, Indian Institute of Management Calcutta, India

Chapter 2
User Acceptance of IoT Applications in Retail Industry ........................................................................ 28
       M. S. Balaji, University of Nottingham – Ningbo, China
       Sanjit Kumar Roy, University of Western Australia, Australia
       Aditi Sengupta, IBS Hyderabad, India
       Alain Chong, University of Nottingham – Ningbo, China

Chapter 3
Technopsychology of IoT Optimization in the Business World ............................................................. 50
       Tommy Prayoga, Bina Nusantara University, Indonesia
       Juneman Abraham, Bina Nusantara University, Indonesia

Chapter 4
The Internet of Things (IoT): Capabilities and Applications for Smart Supply Chain.......................... 76
       In Lee, Western Illinois University, USA

Chapter 5
Privacy in the Internet of Things ............................................................................................................. 94
       Jayashree Kanniappan, Rajalakshmi Engineering College, India
       Babu Rajendiran, Rajalakshmi Engineering College, India
Section 2
IoT Management

Chapter 6
The Internet of Things: Assessing Its Potential and Identifying the Enablers Needed to Capture the Opportunity
Jacques Bughin, McKinsey Global Institute, Belgium
Michael Chui, McKinsey Global Institute, USA

Chapter 7
The Internet of Things: From Things to Valuable Outcomes
Thomas Ochs, Villeroy & Boch, Germany
Ute Anna Riemann, SAP SE, Germany

Chapter 8
Industrial Guidelines for Stimulating Entrepreneurship with the Internet of Things
Mohammad Zarei, University of Tehran, Iran
Ahmad Jamalian, University of Mazandaran, Iran
Rohollah Ghasemi, University of Tehran, Iran

Chapter 9
The Internet of Things: Opportunities, Issues, and Challenges
Edward T. Chen, University of Massachusetts – Lowell, USA

Section 3
IoT Technologies and Applications

Chapter 10
Ravi Ramakrishnan, Amity University, India
Loveleen Gaur, Amity University, India

Chapter 11
Towards Autonomous IoT Logistics Objects
Bill Karakostas, VLTN, Belgium

Chapter 12
The Human-IoT Ecosystem: An Approach to Functional Situation Context Classification
Vaughan Michell, University of Reading, UK
James Olweny, University of Reading, UK
