

Challenging Researches in Economic Sciences

Legal Informatics, Environmental Economics, Economics, OR and Mathematics

Edited by
Munenori Kitahara
Hiroaki Teramoto
Hiroshima Shudo University

Volume 8 in a Series of Monographs of Contemporary Social Systems Solutions
Produced by the Faculty of Economic Sciences, Hiroshima Shudo University

Kyushu University Press

Contents

Preface	i
 Chapter 1 Economics of Personal Information:	
The Ownership and Propertyzation of PII	<i>Munenori Kitahara</i> 1
1. Introduction.....	2
2. The Background and Resolved Issues	3
3. Behavioral Information	7
4. Generation of Personal Information	9
5. Property of Personal Information	11
6. Trade of Personal Information	14
7. Conclusion	16
 Chapter 2 The Asian Infrastructure Investment Bank	
and Building up a New Parallel International Financial System	
.....	<i>Chris Czerkawski and Osamu Kurihara</i> 19
1. Introduction	19
2. The AIIB and the US Response	21
3. Criticism of the Existing International Funding Infrastructure	22
4. The Chinese Rationale for the AIIB	24
5. The AIIB and the New Silk Road	26
6. The Governance of the AIIB	29
7. Potential for Growth of the AIIB	32
 Chapter 3 Application of Environmental Economic Evaluation to Forest Conservation	
Policies in Sabah, Malaysia	<i>Hiroshi Hasegawa</i> 37
1. Introduction	37
2. Necessity of Environmental Economic Evaluation for Forest Policies	38
3. Cost-benefit Analysis	38
4. Application of Environmental Economic Evaluation to Forest Certification Project	39
5. Application of Environmental Economic Evaluation to CDM Project	40
6. Monetary Evaluation Methods for Environmental Values	41
7. Applicable Evaluation Framework	43
8. Results of Economic Evaluation for Natural Ecosystem in Sabah	47
9. Contribution to Forest Policy/Project by Environmental Economic Evaluation	48

Chapter 4 A Comparative Study on Grouping Methods for an Adaptive

Differential Evolution	<i>Setsuku Sakai and Tetsuyuki Takahama</i>	51
1. Introduction		51
2. Related Works		52
3. Optimization by Differential Evolution		53
4. Proposed Method		56
5. Numerical Experiments		59
6. Conclusion		63

Chapter 5 Generators of Irreducible Components of Harmonic Polynomials

in the Case of $so(d, 2)$	<i>Ryoko Wada and Yoshio Agaoka</i>	93
1. Introduction		93
2. Preliminaries		94
3. Irreducible Decomposition of S_n		95
4. Generators of Principal Components		97
5. Generators of Lower Harmonic Components		101
6. Some Conjectures on Lower Harmonic Polynomials		107
7. Reproducing Kernels of Irreducible Subspaces of \mathcal{LH}_n for $n \leq 5$		116

Chapter 6 The Solvable Models of Noncompact Real Grassmannians

.....	<i>Akira Kubo</i>	125
1. Introduction		125
2. Preliminaries		127
3. The Structure of Noncompact Real Grassmannian Manifolds		128
4. Proof of the Main Theorem		131

Contributors		135
