<i>Author's Note</i>	viii
Introduction	1
1 Growing and Shrinking	5
Eros, Thanatos, and the demographic balance in the ancient world ♦ From biological–instinctual conditions to individual choice ♦ The world's changeable geodemography ♦ Revolution and demographic transition: From 1 to 10 billion in two centuries	
2 Land, Water, Air	23
Simeon Stylites and his environmental footprint ♦ The cabal of the $10 \times 2 \times 7$ ♦ More than half the planet changed by human intervention ♦ Population and fragile regions: Coasts, forests, and urbanisation ♦ From the London smog of the seventeenth century to the greenhouse effect in the twenty-first	

3	Adaptation and Self-Regulation	38
	Demographic systems' adaptation and self-regulation ♦ Examples from history ♦ The possibility of regulating modern populations: Reproduction levels and migration ♦ Biological and social change ♦ Italy after the crisis: A system change?	
4	Sustainable ... for Whom?	51
	Zeus, the Brundtland Report, and sustainability ♦ The millennium development goals and the sustainable development goals: Isn't population a priority any more? ♦ Demographic explosion, demographic decline: Both unsustainable ♦ The parable of Tycoonism and Pauperism	
5	Geodemography and Geopolitics	66
	Mussolini: Numbers mean power ♦ The pendulum of fear, between growth and decline ♦ Geodemography and geopolitics ♦ The weight of numbers within states: Ethnicities, religions, minorities, and majorities ♦ Power rankings	
6	<i>Homo sapiens, Homo movens</i>	80
	Shipwrecks and barriers ♦ International migration grows despite obstacles ♦ Demographic and economic pressures ♦ Three globalisation processes in the past, and the fourth one to come ♦ The unsustainability of politics without international rules	
7	Long Lifespans Have Their Cost	96
	A woman from Arles lived to 122 years of age ♦ In the rich countries a life expectancy of 90 is not far off ♦ The sustainability of long lifespans ♦ The profile of a 100-year-old	

society ♦ Rigid ages, flexible roles ♦ Four generations under one roof	
8 Few Prescriptions for Many Ills	110
Poverty and hunger: The millennium development goals reached ♦ But the numbers of poor and hungry in Africa increase ♦ The burden of 168 objectives ♦ The Malthusian trap ♦ Nuclear-armed India with one in five children wasted ♦ Political mission: Concentrate efforts, dismantle the trap	
Epilogue: Our Shrinking Planet	123
A thousand times more crowded, a thousand times smaller ♦ Still today a pendulum of fear between overpopulation and depopulation ♦ Seven demographic and political notes ♦ Awareness of limits
