

Inhaltsverzeichnis

Einleitung

Die Vorgängerstudie

Wie schwer wiegt die Studienfachwahl im Vergleich? Zwei Replikationsstudien zu den geschlechtsspezifischen Folgen der Familiengründung

Präferenzen oder Restriktionen: Warum wählen Frauen und Männer unterschiedliche Studienfächer?

Entwertung oder Selbstselektion: Was stiftet bei Studienfächern den Zusammenhang von Frauenanteil und Lohnniveau?

The gender income gap and the role of family formation revisited: A replication of Bobbitt-Zeher (2007)

Introduction

Overview of the original study

Pure replication

Replication with corrections for endogeneous sample restriction and misspecification

Conclusion

Appendix

References

The gender income gap and the role of education and family formation: A scientific replication of Bobbitt-Zeher (2007)

Introduction

Overview of the original study

Scientific replication

Replication with corrections for endogeneous sample restriction and misspecification

Conclusion

References

Appendix

Preferences, constraints, and the process of sex segregation in college majors: A choice analysis

Introduction

Explanations

Gender essentialism

 Essentialist preferences and abilities

 Essentialist norms

Separate spheres

 Gendered preferences

 Gendered constraints

Anticipated discrimination

Data and modeling strategy

 Person characteristics

 Major characteristics

 Modeling strategy

Results

 Descriptive results

 Multivariate results

Limitations and two calls for replication

Conclusion

References

Appendix

Why do women's fields of study pay less? A test of devaluation, human capital, and gender role theory

Introduction

Theoretical explanations, empirical evidence, and hypotheses

 Valuative discrimination: sex typing

 Specialized human capital and sex segregation

 Gender roles: career orientation, mathematics, and field choice

Data, measures, and statistical methodology

Results

Discussion

References

Appendix

Resümee
